

Footnotes

There currently is no automated footnotes management feature. However, you can manually create footnotes by doing the following:

1. Create a heading at the end of your chapter called Footnotes and apply the "Heading 2" style to it.
2. Create a numbered list of any footnotes you'd like to include. (Note that you can change the numbering style to use letters, numbers, or Roman numerals from the dropdown.)
3. In your text, write the letter or number that corresponds to the desired footnote and apply the superscript format to it by highlighting it and clicking Format > Superscript.

Here is an example:

Technology integration models are common in educational technology.^a However, there is no standard model that all researchers and practitioners use.^b

And the footnotes could be shown like this:

Footnotes

- a. Educational technology is a loosely-defined field.
- b. Some common models include the following: TPACK, SAMR, etc.
